

FUTURE OF FOOD IN NEW HAMPSHIRE
A discussion with Professor John Carroll from UNH

February 17th, 2011
Nesmith Library, Fellows Road,
Windham, NH
6:30 to 8:00 p.m.

John Carroll, Ph.D. Resource Development, will speak about restoring food independence in New Hampshire. This is the subject of his book, *Pastures of Plenty: The Future of Food, Agriculture and Environmental Conservation in New England.*

John E. Carroll is the professor of Environmental Conservation in the department of Natural Resources and the Environment at the University of New Hampshire. In three decades at UNH, he has taught and researched national and international environmental policy, diplomacy, ethics, and values as they pertain to sustainable agriculture and food systems.

This is a great opportunity for Windham residents to start the discussion about how the Town can support agricultural initiatives to promote and encourage local farming, CSAs, farmer's markets, and community gardens.

Anyone interested in local agriculture and learning about programs available at UNH to assist in your farming and gardening efforts are welcome to attend.

This event is co-sponsored by the Nesmith Library, Go Green Windham, and the Windham Community Development Department .
