

# Pembroke Open Space Plan

## Map 8. Green Infrastructure

### GREEN INFRASTRUCTURE:

The Green Infrastructure is a network that contains the highest value natural resources within the community. It is an interconnected area that, if protected from development, should ensure that the services provided by nature to the town and all of its inhabitants will continue indefinitely for future generations.

### Legend

- |                                     |                          |
|-------------------------------------|--------------------------|
| Pembroke Town Boundary              | Lands Under Conservation |
| <b>Roads</b>                        | Lakes and Ponds          |
| Interstates                         | Rivers and Streams       |
| Class I, II, IV State Highways      | Green Infrastructure     |
| Class V Town Maintained Roads       |                          |
| Class VI Unmaintained Roads         |                          |
| Other (private roads, trails, etc.) |                          |

Source Data: 1:24,000 source scale data from NH GRANIT, NH Department of Transportation, and Pembroke Open Space Committee. This map was created in July 2010 by CNHRPC for the Town of Pembroke. It is intended for planning purposes only, not for site specific or regulatory determinations. Corrections should be directed to CNHRPC.
